

Kalaiselvan R

kalaisharma05052003@gmail.com | 9345794092 | Tiruvannamalai, India

OBJECTIVE

A dedicated and enthusiastic fresher seeking an opportunity to leverage my passion for technology, creativity, and problem-solving abilities. Eager to contribute to a dynamic and collaborative team, learn from experienced professionals, and grow both personally and professionally while delivering impactful solutions and value to the organization

EXPERIENCE

TRIADSQUARE INFOSEC PVT LTD | TALENT ACQUISITION EXECUTIVE

Oct 2024 – Present | Tiruvannamalai

- Responsible for sourcing and identifying top talent using platforms like Naukri and LinkedIn.
- Delivered quality profiles tailored to meet the specific requirements of clients, ensuring alignment with organizational needs.
- Built and maintained a strong pipeline of qualified candidates, fostering effective communication with clients and candidates.

AVASOFT | TRAINEE ENGINEER

Apr 2024 – Aug 2024 | Chennai

- Acquired expertise in full-stack development technologies including HTML, CSS, JavaScript, TypeScript, ReactJS, NodeJS, ExpressJS, Golang, MSSQL, Git, and Postman.
- Contributed to Avamigratron, a migration project that utilized Microsoft APIs to transfer data between tenants efficiently.

PROJECTS

TOUR AGENCY WEB APPLICATION | WEB DEVELOPMENT

- Designed and developed a comprehensive platform using React with TypeScript, Node.js and Express and MySQL.
- Enabled users to seamlessly search for tour locations, view detailed information, and book tours efficiently.
- Integrated dynamic features to allow users to manage their travel plans, enhancing convenience and usability.

BUS RESERVATION SYSTEM | CLI BASED PROJECT

- Developed a command-line interface application using Java, JDBC, and MySQL, following Object-Oriented Programming.
- Designed to allow users to perform key operations such as booking, canceling, and viewing bus reservations efficiently.
- Integrated a MySQL database for seamless storage of data.

FILE MANAGEMENT SYSTEM | WEB APPLICATION

- Developed a web application using ReactJS, Golang, Redis, Supabase and PostgreSQL. Used JWT tokens for security.
- Designed to manage user files over the cloud platform and can retrieve, share and delete files upon their needs.
- Integrated a PostgreSQL database for seamless storage of metadata of user files and Redis for caching the metadata and supabase to store the files.
